

Dear Jaiden, Keith, Denem, and Journey,

In the second half of 2019, you graciously funded a portion of charity: water's work in Cambodia as a Water Project Sponsor. Lives have been transformed by your generosity! We're honored to share your impact in the following Completion Report.

100% of your generous donation funded 1 Water and Sanitation Point.

Thanks to you, we're one step closer to making sure every person on the planet has access to clean and safe water. Your donation was part of a \$2,219,350.47 grant that funded 700 projects and brought clean water to 170,151 people!

Clear Cambodia, our implementing partner, passionately serves rural provinces in Cambodia where access to clean water is most limited. While water sources in these regions are abundant, they are often contaminated by fecal waste, iron, arsenic, or other toxins. Safer alternatives are costly, burdening families financially or destroying the local ecology through harmful deforestation practices. Biosand Filters provide a low-cost, low-maintenance, and highly sustainable solution for rural communities.

As a Water Programs Manager at charity: water, I am honored to oversee our partnership, implementation strategy, and commitments in Cambodia. I witness the life-changing impact of clean water every day—transformation you empower through your incredible generosity. Clean water brings health to communities once weakened by disease, gives children access to the education they deserve, and restores families' hope in the future through economic empowerment.

Your kindness is rewriting stories for people in Cambodia. Thank you.

Sincerely,

Stephanie Goetz
Water Programs Manager, charity: water
